

# AFRICAN DIASPORA HEALTHCARE INITIATIVE

*AFDHI: Powering Sustainable Health  
Delivery In Africa*

## WHO WE ARE

The African Diaspora Health Initiative (ADHI) represents a vision for the development of a sustainable health system for Africa powered by the collective vision, passion, and actionable support of African health professionals and partners in the diaspora. ADHI is a hub for African health professionals in the diaspora to collaborate with the African Union, regional governments, health professionals and organizations on the continent to support, develop, lead and implement a sustainable health delivery plan for the African continent. AfDHI is a movement by Africans in the diaspora to take our destinies into our hands by proving that we plan and develop our future instead of relying on others to lead our civilization and development.

## VISION

*An Africa that fully utilizes her human and natural potentials to establish a sustainable health system that provides access to optimum health and wellness to her citizens*

## MISSION

*Mobilize health and medical professionals of African descents in the diaspora to build partnerships with organizations in Africa and abroad to plan and develop a sustainable healthcare delivery system in Africa.*
